EDUCATION

Medhavi Skills University, Sikkim

Aug 2025 – Expected 2029

Bachelor of Technology in Computer Science and Engineering — CGPA: 8.8

St. Mary's Group of Institutions, Hyderabad

2022 – 2025

Diploma in Computer Science and Engineering — CGPA: 8.8

TECHNICAL SKILLS

Languages: Java, C++, C, Python, JavaScript, SQL

Frontend: React.js, HTML5, CSS3, Bootstrap

Backend & Databases: Node.js, Express.js, Next.js, REST APIs, MongoDB, MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Docker, Postman, VS Code, Vercel

Core Concepts: Data Structures & Algorithms, OOP, JWT Authentication, REST API Design, Blockchain Fundamentals

PROJECTS

InternScope AI | Next.js, Prisma, PostgreSQL (Neon), Trigger.dev, Clerk

internscope-ai.vercel.app

- Co-built an AI-driven internship discovery platform (team project) aggregating internship-only listings from 86+ company career pages (Greenhouse, Lever, Ashby, SmartRecruiters, Workday), scaling from ~60 India-only listings to 337+ across India and global markets.
- Engineered automated twice-daily sync pipelines with Trigger.dev on a Next.js/Prisma/Neon Postgres stack, with Clerk for authentication, plus AI resume match-scoring with ATS keyword suggestions.
- Shipped an AI mock-interview module (STAR-format feedback) and an application tracking dashboard; pitched the product for the Razorpay Buildathon.

Garuda Wish Wall | MongoDB, Express.js, React.js, Node.js

- Developed a full-stack social platform for securely posting, managing, and exploring anonymous wishes, with JWT-based authentication and RESTful APIs.
- Designed a responsive, modern UI/UX with React and Bootstrap, deployed on Vercel.
- Built complete CRUD functionality with secure user management and dynamic content updates.

Hand Gesture Recognition | Python, OpenCV, MediaPipe

- Built a real-time computer vision application recognizing multiple hand gestures from webcam input, using OpenCV and MediaPipe for accurate landmark detection.
- Optimized frame handling for smooth, low-latency recognition performance.
- Explored gesture-based interaction patterns for automation and human-computer interaction use cases.

AI Assistant | Python, Speech Recognition, Java, C++

- Developed a desktop AI assistant executing voice- and text-based commands, integrating speech recognition, text-to-speech, web automation, application launching, and web search.
- Designed a modular Java/C++ architecture to support future AI feature integration.

LEADERSHIP & ACTIVITIES

Google Student Ambassador

May 2026 – Sep 2026

- Conducted student workshops as part of the Google Student Ambassador program, helping peers build technical and developer skills.
- Volunteered to conduct "Sagu Bhumi," a project showcase workshop, at St. Mary's Group of Institutions.

TRAINING

Industrial Training — Python Full Stack Development, New Vision Tech

Jan 2024 – Jun 2024

- Built a Blockchain-based Fake News Detection System using Python and full-stack technologies.
- Designed backend logic, integrated databases, and implemented REST APIs connecting frontend and backend.
- Collaborated in a team environment following software engineering best practices and Git-based version control.

ACHIEVEMENTS

- Selected as a Wipro Scholar Trainee during the second year of Diploma.
- Achieved a 1400+ rating on CodeChef and an 853 rating on Codeforces through consistent competitive programming.
- Solved 150+ problems on HackerRank and 30+ algorithmic problems on LeetCode.
- Secured 2nd Place in the college-level Hackathon for an innovative software solution.

CERTIFICATIONS

Introduction to Claude Code • Infosys Springboard — Java Programming • Infosys Springboard — Python Programming
